

Your drum baling solution

Particularly designed to flatten almost all kinds of **steel drums or barrels, such as oil drum, paint drum, etc.** With a 6:1 compaction ratio, the drum compactor can effectively reduce the volume of drums to facilitate the transportation and recycling.

DRUM BALER

SERIES 1 // SVB2-MD-300

CUSTOMIZED // MADE-TO-ORDER MODELS ARE AVAILABLE

FEATURES

Liquid Recycling Channel
for draining the residual liquid

Metal Blocker
for preventing drum from skidding

Spikes in Plate
for puncturing the drums to release air during compression

Specifications

MODEL	SVB2-MD-300
Compressing force	30Tons
Compress size	760*760*(150-900)mm
Compressing size	760*760*950 mm
Throughput (approx.)	40-60pcs/h
Voltage (customizable)	380V, 3 phase, 50Hz
Power	4kw
Machine weight (approx.)	800kg
Overall dimension	960*1000*2380mm

* Unit bale weight depends on the material used and bale size you adjust
